25X1

REFERENCE: HTA/SI/R-10-58 Electronics sites of possible interest to ED/OSI as reported in the 4000 series mission coverage summaries.

25X1

[] WAC 328

"Probable electronic installation w/ elaborate; comparatively short, antenna array."

This installation is located at SARY-AGACH, 41°28'N 69°10'E, just north of TASHKENT. The installation is being analyzed under CIA requirement RR/HTA/E/R84/57, a study of communications facilities within a 40 KM radius of TASHKENT.

25X1

2. [] WAC 246

"Possible electronic or guided missile installation"

This installation is a probable microwave relay station located at 44°31'N, 66°15'E, and is being covered in CIA requirement RR/HTA/E/R84/58.

25X1

3. [] WAC 161

"Possible microwave relay station"

This installation is located 40 nm SW of BIYSK at 52°05'N 84°28'E. A tower cannot be identified at this site and the general appearance does not indicate an electronic site.

25X1

4. [] WAC 244

"Probable radar and communications center,"

This installation is located on the south eastern shore of Lake Balkhash at 46°20'N, 78°29'E. It is most probably a small storage area for small arms ammunition or explosives and not a radar and communications center.

25X1

5. [] WAC 238

25X1

[] isolated, north of KARAGANDA;"

No electronic sites can be identified in this area. The round objects described in the MCS are underground water tanks serving nearby installations.

6. [] WAC 238

"KARAGANDA;....., electronic facility."

This installation is a radio station under construction. NSA Brief, B-97-57, dated 31 December 1957, is a description and analysis of this installation.

25X1

7. [] WAC 238

"U/I round objects; pairs are equally spaced."

These objects appear to be agricultural or archeological patterns and are not associated with electronics.

25X1

8. [] WAC 246

"Possible electronic site; cross T scarred earth, largest scar approximately 3,800', shortest 2,100'."

This installation is located 65 nm NNW of KZYL-ORDA. It is believed to be tied in with the TYURA-TAM missile test range, and is being described in the report on that installation.
